Following the presentation, Chad Park, Senior Consultant with The Natural Step Canada will facilitate a group-wide discussion on how co-ops and credit unions can adapt to the climate change realities. It is recommended that you view An Inconvenient Truth video which can be found at any video store, prior to the Forum.

1 CSR 101
This workshop will provide an introduction to corporate social responsibility (CSR), what it is, how you can do it, and the business case for why to do it. 3 Measuring and Reporting Corporate Social Responsibility
Enhancing reputation, meeting regulatory requirements, and building stronger relationships are all outcomes of strong Corporate Social Responsibility reporting. In this workshop, three leading co-ops and credit unions will outline how they have implemented CSR reporting in their businesses. Topics will include: why bother reporting? performance indicators; stakeholder engagement in the process; report assurance; and communicating your report.

4 Investing in Social Enterprise and Co-operatives
This workshop will showcase innovative approaches and tools for supporting social enterprise and co-operative development through investment.

Then, the workshop will cover one of the topic areas in-depth, namely: "Blood and Oxygen; Navigating the Valley of Death". This workshop will consider the issues from the perspective of both co-operative developers and lenders.
